# The 2018 <br> SSF National Sports－Life Survey 

Executive Summary March 2019，Japan

## Overview

## 1 Introduction

In order to understand the level of participation in sports and physical activities by Japanese, the Sasakawa Sports Foundation (SSF) has examined the statistical data gathered through the "SSF National Sports-Life Survey", which has been conducted every other year since 1992. This survey measures the number of people aged 18 and over taking part in sports and physical activities across Japan in terms of frequency, duration and intensity. People take part in sports and physical activities in different ways, with many doing a range of activities including sports spectating, sports volunteering.

## 2 Survey design

1) Population: People aged 18 and over who live in Japan
2) Sample size: 3,000
3) Number of locations: 300 ( 88 in metro areas; 122 in cities with a population of over 100,000 people; 65 in cities with a population of less than 100,000 people; 25 in towns and villages)
4) Extracting method: Quota method

## 3 Survey period

July 6th - August 10th,2018

## 4 Survey methods

Leaving method:
The survey official visits the respondent, distributing the paper-based questionnaire and having the respondent fill out the survey within a certain period. The survey official then returns to the respondent to collect the survey.

## 5 Survey sample

3,000 (Male : 1,491, Female : 1,509)
$18 \cdot 19$ years old 71 (Male : 37, Female : 34)
20-29 381 (Male: 194, Female : 187)
30-39 480 (Male : 245, Female : 235)
40-49 595 (Male : 303, Female : 292)
50-59 481 (Male : 242, Female : 239)
60-69 564 (Male : 276, Female : 288)
70 and over 428 (Male : 194, Female : 234)

Levels of sports and physical activities ..... 2
Types of sports and physical activities ..... 4

- Sports clubs ..... 6
$\square$ Sports spectating ..... 8
- Sports volunteering ..... 12

## Description of terms

O Range of sports and physical activities
This survey measures a wide range of sporting activities including fitness activities, Strolling/Walking/Cycling for leisure or travel and dance. The school PE classes were excluded whilst sports club activities at schools and workplaces were included

## - Estimated participants

Estimated sports participants are calculated by applying the rate of regular sports and physical activities participation over the past year to the total population of those 18 and over ( $106,011,547$ people in Japan).

## - Level of participation in sports and physical activities

 In this survey, the participation in sports and physical activities are divided into the following levels; "Level 0 " for those who did not participate in any sports or physical activities for the past year; "Level 1" for those who participated at least once during the year, but less than twice a week; "Level $2^{\prime \prime}$ for those who participated at least twice a week; "Level 3 " for those who participated at least twice a week with a duration of "more than 30 minutes"; and "Level 4" for those who participated at least twice a week, duration of "more than 30 minutes", and with more than moderate intensity,Date 31 Dec. 2018

## Annual changes in sports and physical activities

## Annual changes in sports and physical activities

$74.0 \%$ of people participated in sports and physical activities at least once in 2018 .
The percentage of people who participate at least once a week has risen since 1992, from 23.7\% to 57.9\% in 2018.
Similarly, the percentage for participation at least twice a week in 2018 was $47.8 \%$, continuing its climb from the $16.1 \%$ recorded in 1992.
The number of active sports participants was at an all-time high of $\mathbf{2 0 . 7} \%$.

## Levels of sports and physical activities

## Definition of levels

## Levels of sports and physical activities

| Level | Definition |
| :---: | :---: |
| Level 0 | For the past year, no sports/physical activities at all |
| Level 1 | At least once a year, less than twice a week (1-103 times a year) |
| Level 2 | At least twice a week (at least 104 times a year) |
| Level 3 | At least twice a week, at least 30 min at a time |
| Level 4 Participant] | At least twice a week, at least 30 min at a time, moderate intensity at least slightly hard |

$26.0 \%$ of people ( 27.56 million) were Level 0 , meaning that they did not participate in sports and physical activities at all in the past year. $\mathbf{2 6 . 2} \%$ of people ( 27.78 million) were Level $1,9.5 \%$ ( 10.07 million) were Level 2 , and $\mathbf{1 7 . 6 \%}$ ( 18.66 million) were Level $3 . \mathbf{2 0 . 7} \%$ of people ( 21.94 million) were Level 4 , meaning that they participated with the most frequency and intensity.

## Levels of sports and

 physical activities: By gender45.5\% of males and 50.0\% of females participated in sports and physical activities at least twice a week (Level 2 or greater), with females holding a higher percentage by 4.5 points.
$23.8 \%$ of males and 28.2 \% of females did not participate in sports and physical activities at all (Level 0 ), with females holding a higher percentage by 4.4 points.

Levels of sports and physical activities: By age

Of the people who participated in sports and physical activities at least twice a week (Level 2 or greater), 60.6\% were aged 18-19, 37.1\% were in their 20-29, 41.9\% were in their 30-39, 38.0\% were in their 40-49, 45.3\% were in their 50-59, $57.2 \%$ were in their 60-69, and $\mathbf{6 5 . 9 \%}$ were in their 70 and over.
The percentage of people who participated at least twice a week increased along with the percentage of people in their 40 s and over who participated.

## Types of sports and physical activities

## Types of sports and physical activities

## Types of sports and physical activities: By gender

| Rank | Total ( $\mathrm{n}=3,000$ ) |  |  |
| :---: | :---: | :---: | :---: |
|  | Types of sports | Participation rate (\%) | Estimated participants (in 10,000s) |
| 1 | Strolling | 30.9 | 3,276 |
| 2 | Walking | 25.4 | 2,693 |
| 3 | Calisthenics and light exercises | 19.6 | 2,078 |
| 4 | Weight training | 15.2 | 1,611 |
| 5 | Bowling | 9.9 | 1,050 |
| 6 | Jogging and Running | 9.6 | 1,018 |
| 7 | Golf on a course | 8.1 | 859 |
| 8 | Fishing | 7.2 | 763 |
| 9 | Swimming | 6.9 | 731 |
| 10 | Golf practice on a driving range | 6.6 | 700 |
| 11 | Sea bathing | 6.4 | 678 |
| 12 | Cycling | 5.9 | 625 |
|  | Table tennis | 5.9 | 625 |
| 14 | Playing catch | 5.7 | 604 |
| 15 | Yoga | 5.5 | 583 |
| 16 | Badminton | 5.2 | 551 |
| 17 | Football | 4.7 | 498 |
| 18 | Jumping rope | 4.5 | 477 |
| 19 | Hiking | 4.2 | 445 |
| 20 | Baseball | 3.8 | 403 |
| Note: The estimated number of participants was calculated by multiplying the total population of individuals aged 18 and over (106,011,547 people according to the basic resident register as of January 1, 2017 in Japan) by the percentage of each participation level. |  |  |  |

Of the sports and physical activities performed in the past year, "Strolling" came in first place at 30.9\% (32.76 million people), followed by "Walking" in second place at 25.4\% (26.93 million people), "Calisthenics and light exercises" in third place at $19.6 \%$ ( 20.78 million people), "Weight training" in fourth place at $15.2 \%$ (16.11 million people), and "Bowling" in fifth place at $9.9 \%$ ( 10.50 million people).

| Male ( $\mathrm{n}=1,491$ ) |  |  | Female ( $\mathrm{n}=1,509$ ) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Rank | Types of sports | $\begin{array}{\|} \text { Participation rate } \\ (\%) \end{array}$ | Rank | Types of sports | $\underset{(\%)}{\text { Participation rate }}$ |
| 1 | Strolling | 26.0 | 1 | Strolling | 35.8 |
| 2 | Walking | 24.1 | 2 | Walking | 26.6 |
| 3 | Weight training | 17.4 | 3 | Calisthenics and light exercises | 25.0 |
| 4 | Golf on a course | 14.8 | 4 | Weight training | 13.1 |
| 5 | Calisthenics and light exercises | 14.0 | 5 | Yoga | 9.7 |
| 6 | Jogging and Running | 13.3 | 6 | Bowling | 8.7 |
| 7 | Golf practice on a driving range | 11.7 | 7 | Table tennis | 6.6 |
| 8 | Fishing | 11.6 | 8 | Badminton | 6.4 |
| 9 | Bowling | 11.1 | 9 | Swimming | 6.1 |
| 10 | Playing catch | 8.1 | 10 | Jogging and Running | 6.0 |
|  |  |  |  | Jumping rope | 6.0 |

Among females, participation in "Strolling", "Walking", "Calisthenics and light exercises", and "Weight training" was high.
For males, participation in those four activities as well as "Golf on a course", "Jogging and Running", "Golf practice on a driving range", "Fishing", and "Bowling" all exceeded 10\%.

|  | Yoga | 6.4 |  |  |  |  | Yoga | 4.2 |  |  |  |

Participation in "Strolling", "Walking", "Calisthenics and light exercises", and "Weight training" was high across all age groups, both young and old. In addition, team ball sports such as "Football" and "Basketball" ranked highly among people aged 18 to 39
Those activities were replaced by "Golf on a course", "Golf practice on a driving range", and "Cycling" for people in their 40s and over.

Sports club membership:Total and by gender

$18.5 \%$ of people are members of sports clubs, $23.9 \%$ are former members of sports clubs, and $\mathbf{5 7 . 6} \%$ have never joined sports clubs.
In terms of gender, $\mathbf{2 0 . 0} \%$ of males and $\mathbf{1 7 . 0} \%$ of females are members of sports clubs.
This difference of 3points between males and females has narrowed since the first survey was conducted in 1992, when the gap was 8.6points.

The rate of sports club membership of the people over the age of $70(24.2 \%)$ was the highest, followed by those aged 18-19 ( $21.1 \%$ ), those in their 60-69 ( $20.0 \%$ ), and those in their 50-59 ( $18.7 \%$ ).
Starting with people in their 30-39, the rate of sports club membership increased as age increased.

## Types of sports clubs:Total and by gender

## Types of sports clubs: By age

The rate of membership in "Community groups and clubs" was the highest at 34.7\%, followed by "Friends and acquaintances' clubs" at 25.9\% and "Private clubs" at 20.4\%.
Among males, membership in "Community groups and clubs" was the highest at $31.4 \%$, followed by "Friends and acquaintances' clubs" at $30.7 \%$ and "Workplace clubs" at 17.4\%.
Among females, membership in "Community groups and clubs" was the highest at $38.4 \%$, followed by "Private clubs" at $31.8 \%$ and "Friends and acquaintances' clubs" at 20.4\%.

The rate of membership in "Friends and acquaintances' clubs" was the highest among the younger age groups- 46.7\% for those aged 18-19 and 39.3\% for those in their 20-29.
The membership rate in "Workplace clubs" was relatively high (25.0\%) for people in their 30-39 compared to other age groups.
Starting with the 40-49 age group, membership in "Community groups and clubs" increased as age increased-24.3\% for those in their 40-49, 37.1\% for those in their $50-59, \mathbf{4 1 . 8} \%$ for those in their $60-69$, and $\mathbf{5 3 . 9} \%$ for those over the age of 70 .

Live sports spectating: Total and by gender
Live sports spectating: By age

The percentage of people who attended a live sporting event at a stadium or arena in the past year was $\mathbf{3 1 . 8} \%$. In terms of gender, $36.6 \%$ of males and $27.1 \%$ of females attended a live sporting event, a difference of 9.5 points.
This trend of males attending live sporting events more than females has remained unchanged since this survey item was added in 1994.

Live sports spectating was the highest for people in their 40-49 (39.7 \%), followed by those aged 18-19 ( $\mathbf{3 9 . 4 \%}$ ) and those in their 50-59 ( $33.9 \%$ ).
This trend of a high percentage of people in their 40-49 attending live sporting events was also seen in past surveys.

| Rank | Types of sports | Total ( $\mathrm{n}=3,000$ ) |  |  | (3) <br> Estimated annual total (1) $\times$ (2) (in 10,000s) |

| ※NPB:Nippon Professional Baseball |  |  |  |  |  |  |  |  |

Of the sports that were watched on TV in the past year, the most popular was "Japan National Football Team games including the olympics" at 64.0\%, followed by "Professional baseball (NPB)" at $51.8 \%$, "Figure skating" at $\mathbf{4 8 . 2} \%$, "High-school baseball" at $\mathbf{4 4 . 8 \%}$, and "Marathon and Ekiden road relay" at $\mathbf{4 0 . 8} \%$. Among males, "Japan National Football Team games including the Olympics" was the most watched on TV at $67.3 \%$, followed by "Professional baseball (NPB)" at $63.2 \%$ and "High-school baseball" at $51.4 \%$. Among females, "Figure skating" was the most watched on TV at $63.2 \%$, followed by "Japan National Football Team games including the Olympics" at $60.7 \%$ and "Professional baseball (NPB)" at $40.6 \%$.

Sports volunteering:Total and by gender

6.7\% of people participated in sports volunteering in the past year.

There has been almost no change in this statistic since the survey began in 1994 In terms of gender, $8.2 \%$ of males and $5.3 \%$ of females participated in sports volunteering. This trend of higher volunteer participation among males than females was also seen in past surveys.

Sports volunteering: By age

The sports volunteering participation rate was the highest for people aged 18-19 ( $9.9 \%$ ), followed by those in their 20-29 and 50-59 (7.3\% for both those age groups)
The rate of desire to participate was also the highest for people aged 18-19 (36.6\%), followed by those in their 20-29 (19.7\%) then those in their 40-49 (16.6\%).

## Towards the Realization of "Sport for Everyone" Society

The Sasakawa Sports Foundation [SSF] has continued to pursue research and survey activities, human resource development, and collaboration with local governments and sports promotion institutions under the banner of a "think tank specializing in sports." Our dream is to create a society in which everyone living in Japan can enjoy sports in their own way, whether through participating or watching or volunteering. To put it another way, we want to create a "Sport for Everyone" society.

Over the past several years, many books have attempted to predict Japan's future. Trends often mentioned include Japan's population decline, declining birth rate, aging society, and the social, economic, and financial effects engendered by these multiple factors.
In response to these challenges, SSF proposes solutions based on the value of sports. This is because we believe sports offer characteristics and values capable of changing people's lives, changing society, connecting to the wider world, and contributing to a better future. Activating the solutions inherent in sports will require an understanding of these values among the widest possible portion of society and a translation of these values into everyday life. Ultimately, this will lead to government policies that promote a culture of health and longevity, with the entire population involved in sports.

SSF seeks to function as a think tank which collaborates with various figures and organizations, operating beyond a narrowly defined concept of sports in order to convert its inherent value into a force that can challenge a wide range of societal issues both now and in the future.
As we look to the future, we will continue doing everything possible to develop a "Sport for Everyone" society.

Sasakawa Sports Foundation

## Outline of Activities

## 1. Research and surveys

The Institute of Sports Policy, established in SSF carries out fact-finding surveys, case studies and empirical research.
The institute gathers and analyses quantitative data and advanced cases in the country as well as overseas, which are essential for the national government and local governments to draft sports policy and for various organizations to plan sports promotion programs. SSF proactively makes proposals for policies to governments and for plans to sports organizations, based on evidence obtained from the research and survey.

## 2. Collaboration with local governments

SSF promotes a nationwide sport program, which aims to encourage people to participate in sports and physical activities, called Challenge Day. In this program, municipal communities with similar size of populations compete over the percentage of their residents who did some kind of sports and physical activities for a minimum of fifteen minutes on the last Wednesday of May. Through Challenge Day, SSF is able to forge closer links with local governments and other organizations, and to verify that sports are beneficial in building local communities and promoting relationships between people of different generations, and to propose a system in which individual residents can enjoy sports in their communities.
Furthermore, in collaboration with local governments who participate in Challenge Day and with other local governments nationwide, SSF draws up sports promotion plans for local communities and offers the results of its surveys and research.

## 3. Public relations

SSF disseminates the information about its initiatives as described above, and releases the latest sports information in the country and overseas that is beneficial for sports policy research, through its official website, social media, symposiums, seminars, and international conferences.
As part of its public relations activities, SSF publishes the results of the National Sport and Lifestyle Survey, which is biannually conducted to understand the state of participation and involvement in sports by Japanese, by means of a report called the SSF National Sports-Life Survey.
SSF also brings out and extensively distributes Sport White Paper, in which the latest data in the country and overseas is printed.
